

Monte San Savino

The history of Mount Saint Savino coincides with those of the Guelfa Florence with the enemy Arezzo.

Devastated from the Ghibellino Bishop Guido Tarlati, here still today remembered with the soup that it carry his name, Mount Saint Savino preserve the his small entourage of boundaries with his two principal doors from florentine gate to roman gate
We recommend of begin the visit to Mount Saint Savino departing from the Palace Comunale (with attached the Loggia of the Merchants) and the hanging garden situated along the principal road.

Then you can see the Cassero with to his inside the small museum of ceramics.
